

Presented by Peter Luff

Resolution to WFM Council 27th-29th October 2009

Taking note of previous WFM Resolutions on the need to strengthen the global response to climate change and other environmental issues, in particular the 'establishment of an International Environmental Court' (San Francisco Congress 1995) and the Geneva Congress resolution on environmental governance, the Council welcomes the initiative taken by the International Court for the Environment Coalition in 2009 to further this objective and calls upon WFM Member and Affiliated Organisations to assist the Coalition in achieving this goal as a step towards creating a necessary and effective global institutional framework.
